

Specialised Bolts as per Drawing

Special-purpose bolts and fasteners manufactured to customer drawings.

Made to drawing

Non-catalogue bolts manufactured exactly to your dimensions.

Replacements

Bolts recreated from a sample or an older drawing.

Fabrication support

General engineering and metal-fabrication from the same works.

ABOUT

Custom fasteners

Special bolts and fasteners that are not off-the-shelf items, manufactured to your drawing — with general engineering and metal-fabrication support from the same works.

DESCRIPTION

Overview

Plants and contractors regularly need fasteners that no catalogue lists: an unusual length, a special head, a non-standard thread length or a replacement for a part that is no longer available. S A Engineering manufactures these specialised bolts to the customer's drawing, and backs them with general engineering and metal-fabrication work for industrial customers.

Typical requirements

- Special lengths, heads or thread lengths
- Replacement bolts made from a sample or an old drawing
- Small batches for maintenance shutdowns
- Fastening hardware for fabricated assemblies

Specification

Made to	Customer drawing or approved sample
Support	Engineering & metal fabrication
Batch size	As required by the job

What to send with your enquiry

1. Drawing with dimensions and tolerances, or a sample
2. Material grade and any heat-treatment requirement
