

Track Bolts for Points & Crossings (RDSO/T-11504 – T-11549)

Track bolts for points and crossings to RDSO drawings T-11504 to T-11549.

T-11504 to T-11549

The full RDSO drawing series for points and crossings bolts.

One drawing per line

Each drawing is quoted and manufactured as its own line item.

Turnout ready

For new turnouts and for maintenance replacements alike.

ABOUT

Track bolts

Track bolts for points and crossings across the RDSO drawing series T-11504 to T-11549 — quote the drawing numbers and quantities and we manufacture to each one.

DESCRIPTION

Overview

Points and crossings — turnouts — let trains move from one track to another, and they are assembled from many bolted components. The bolts that hold crossings, check rails, blocks and switch assemblies together are specified drawing by drawing, because each position carries different loads and has a different length, head and thread.

S A Engineering manufactures track bolts for points and crossings to drawings in the RDSO series **T-11504 to T-11549**. Send the list of drawing numbers with quantities and we confirm feasibility, price and delivery for each line.

Where they are used

- New turnouts and crossing assemblies
- Replacement of worn or missing bolts during points and crossings maintenance
- Yard remodelling and siding works
- Steel plant and colliery sidings built to railway standards

Specification

Drawing series	RDSO/T-11504 to T-11549
Application	Points & crossings (turnouts)
Made to	The specified RDSO drawing and alteration

S A ENGINEERING
